

PURPOSE

We're excited to reintroduce burritos in a **new, easier-to-execute format** that delivers the flavor and value guests love while simplifying operations for site teams. Guests have been asking for the return of burritos, and this new offer makes it possible with **less labor, fewer ingredients to manage, and a more streamlined ordering process**. By reducing complexity while maintaining great taste and quality, we're making it easier than ever to offer a guest favorite and drive satisfaction at your site.

BURRITO PROCESS

1. Burritos arrive at your site fully assembled and individually packaged for easy execution.
2. Remove the quantity needed from the case prior to use to allow proper thawing.
3. Do not thaw more than a **3-day supply** at one time.
4. Keep burritos **sealed in their original packaging** throughout the thawing process.
5. Apply the appropriate **AD Ops thaw label** to the sheet pan or Cambro used for thawing.
6. Do not remove burritos from the package prior to cooking. Burritos are designed to be cooked **in the bag**.
7. Once thawed, burritos have a **7-day refrigerated shelf life**.
8. Follow the **Burrito Cooking Guide** for all cooking procedures and preparation requirements.

THAWING OPTIONS

Burritos may be thawed using one of the following methods:

Sheet Pan Method: Place up to **11 burritos** in a **single layer on a sheet pan** and thaw under refrigeration for **at least 24 hours**.

Cambro Method: Place up to **10 burritos** in a **Cambro, double stacked**, and thaw under refrigeration for **up to 48 hours**.
